# 10 Ways to Create a COVID-Free Winter Worksite

If you've ever worked outside during winter, you know it can be a beast. Biting winds, blinding snow and sub-zero temperatures add new risks to your work day. And now with COVID, those risks have multiplied. To help keep you and your crews safe this winter, we've put together a list of 10 ways to combat cold stress and COVID on the job site.

**1. Keep an eye on hands and feet. This is where hypothermia and frostbite will appear first.** If any of these symptoms present, get into a warm location, remove wet clothing and drink something warm until medical help arrives.

## Hypothermia Symptoms

- Shivering
- Fatigue
- Loss of coordination
- Confusion
- Bluish skin
- Slowed breathing
- Loss of consciousness

## Frostbite Symptoms

- Numbness
- Tingling/stinging sensations
- Aching
- Blue waxy skin

## Stages of Frostbites

- 2. Wear three loose layers:**  
**Inner layer:** moisture-wicking wool, silk or synthetic  
**Middle layer:** insulating wool or synthetic  
**Outer layer:** rain- and wind-proof with some ventilation
- 3. Limit headcount for indoor workspaces, like job site trailers.** Place disposable face masks and hand sanitizer at entrances. Keep windows and doors cracked for good airflow.
- 4. Implement multiple work shifts to lower viral transmission risk.** Adopt staggered work schedules (providing alternating workdays, multiple shifts, etc.) and assign the same workers to the same shifts. Use partitions or tarps to create socially distanced work zones.

## Key Times to Sanitize Hands

- Before and after shifts and breaks
- After nose blowing, coughing or sneezing
- After restroom use
- Before and after eating
- After touching shared tools or equipment
- Before putting on/after taking off PPE

Information in this article is sourced from the Conney Safety consulting team, as well as the CDC, EPA and OSHA.

**5. Issue each worker his or her own personal safety gear, including jackets, vests, hard hats, eye and ear protection, hand warmers, balaclavas, hand sanitizer and winter footwear.**

**6. Clean and disinfect high-touch surfaces before and after each shift.** Think shared tools, handrails, portable heaters, warmers, coffeemakers, shovels, scrapers, doorknobs, time clocks, etc.

**7. Replace face masks and respirators when wet, soiled or visibly contaminated.** This protective gear loses effectiveness when compromised.

**8. Winterize your cleaners and disinfectants.** If your cleaners and disinfectants start freezing when temps dip, mix in a small amount of propylene glycol at a ratio between 1:20 to 1:40. This clear, biodegradable solvent is often used in foods and is considered safe for all surfaces.

**9. Clean and disinfect vehicles, equipment and tech devices before and after each shift.** Clean the non-porous surfaces (key fob, steering wheel, seats, arm rests, door handles, etc.) and soft, porous surfaces like fabric seats. If surfaces are grimy, clean with an EPA-approved detergent or soap prior to disinfecting with an EPA-approved antimicrobial disinfectant. For tech devices, use 70 percent alcohol-based wipes or sprays.

**10. Use partitions or tarps to create socially distanced work zones.**

## OSHA's Work/Warm Up Guidelines for a Four-Hour Shift

Air Temperature : Sunny Sky	No Noticeable Wind		5mph Wind		10mph Wind		15mph Wind		20mph Wind		
Approximate Temperature	Max Work Period	Breaks	Max Work Period	Breaks	Max Work Period	Breaks	Max Work Period	Breaks	Max Work Period	Breaks	
-26 to -28°C -15 to -19°F	●	1	●	1	75 min.	2	55 min.	3	40 min.	4	
-29 to -31°C -32 to -34°F	●	1	75 min.	2	55 min.	3	40 min.	4	30 min.	5	
-32 to -34°C -25 to -29°F	75 min.	2	55 min.	3	40 min.	4	30 min.	5	Non-emergency work should cease		
-35 to -37°C -30 to -34°F	55 min.	3	40 min.	4	30 min.	5	Non-emergency work should cease				
-38 to -39°C -35 to -39°F	40 min.	4	30 min.	5	Non-emergency work should cease						
-40 to -42°C -40 to -44°F	30 min.	5	Non-emergency work should cease								
-43°C & below -45°F & below	Non-emergency work should cease										

● = Normal Breaks.

Schedule applies to any four-hour work period with moderate to heavy work activity; with warm-up periods of ten (10) minutes in a warm location and with an extended break (e.g. lunch) at the end of the four-hour work period in a warm location. Adapted from ACGIH 2012 TLVs.

### N-Ferno® 6818 Winter Cap & 6821 Fleece Balaclava Liner

Gear up for cold season with the Ergodyne® winter cap and balaclava. The snug-fitting knit cap with soft fleece liner feels and looks great, while the balaclava winter liner is made of stretchable polyester fleece and provides greater coverage in harsh conditions.

- 23278 Balaclava
- 229272 Hat

### N-Ferno® Warming Packs & Toe Warming Packs

Warming packs provide up to 12 hours of heat. To activate, simply open the pack. The all-natural ingredients heat up when they contact oxygen. You can even seal these packs from oxygen in a zip-loc bag and reuse them the next day.

- 31540 Hand Warming Packs
- 31541 Toe Warming Packs

# Foiling Winter Fall Hazards

## Common Injuries Continue to Occur

Most of us have seen someone take a nasty spill on a slippery winter surface or have been victims ourselves. It can be more than embarrassing. Slips, trips, and falls cause nearly 700 fatalities and many more injuries each year in workplaces, according to the Bureau of Labor Statistics. But you can help prevent these injuries before they occur. Look out for your co-workers when you see unsafe behavior and share these winter walking tips:

- Take extra time and care when getting in and out of vehicles. Use the vehicle for support. Slide your foot out of the vehicle to check if the ground is icy.
- Walk as flat-footed as possible to maximize contact and friction if you do en-counter slippery surfaces
- Wear winter-appropriate footwear with adequate traction. Carry your office shoes inside if necessary.
- Avoid carrying items or walking with your hands in your pockets. This can reduce your ability to catch yourself if you lose your balance.
- Avoid uneven surfaces and maintain awareness of steps or curbs.
- Treat slippery surfaces with salt or sand as soon as possible. If materials are not immediately available, report untreated surfaces to your manager or facilities representative.
- Always use handrails when possible.

### ICETrekkers® Diamond Grip™

Aggressive traction for all winter walking conditions, from ice to back country snow. Provides additional stability when transitioning from icy surfaces to gravel, rock and mud.

- Constructed from case-hardened steel alloy and aircraft cables
- Patented Diamond Bead edging grips in all directions
- Hearty rubber slings adhere securely to footwear
- Easy on, easy off strapless design

606822 Large (fits over men's shoe size 9.5-12.5)  
Available in S-2XL

### Ice Traction Grippers

These rugged steel studs provide traction and stability when walking through ice and snow.

- Easy-on, easy-off stretchable rubber grippers
- Comes with two replacement studs

10486 Large (fits over men's shoe size 8-11)  
Available in M-2XL

### Trex® 6325 Slip-On Spikeless Traction Devices

Spikeless, scratch-free traction both indoors and outdoors. Strategic grooves, micro-pumps and block siping for optimal grip on water, ice or snow.

- Adjustable cord cinches tight for secure fit
- Easy-on, easy-off stretchable rubber grippers

75641 Large (fits over men's shoe size 8-11)  
Available in sizes M-XL

## TINGLEY

### Winter-Tuff® Orion XT™ Ice Traction Overshoes

Prevent slip-and-fall injuries when working on ice and snow with durable, over-the-boot traction. The wide-opening gusset and multiple adjustment points easily slip over work boots. The tungstencarbide studded outsole stabilizes you on icy, snowy surfaces. Waterproof 40-denier nylon upper is molded directly to the polyurethane sole for ultimate dryness, year after year.

- Lightweight, anti-fatigue design for all-day comfort
- Heel counter-stabilizer prevents side-to-side rolling
- Hi-vis 360-degree reflective accents
- Roll-away gaiter for 20 inches of deep-snow protection

13197 Large  
Available in S-2XL

# DIRECTSAFETY®

## Type R Class 3 Quilt-Lined Premium Jacket

Quite possibly the smartest, most user-friendly safety jacket around. This premium-quality quilted safety jacket is packed with every feature you can think of—and then some. Constructed with an ultra-tough 300-denier nylon/polyurethane coating and fully sealed seams, this jacket is truly built to last. The high-visibility yellow fabric with two-inch ANSI-compliant reflective tape keeps you safe and seen while the black hem on body and sleeves conceals dirt and grime.

- Longer backside keeps you covered when reaching
- Insulated with a quilted liner for added warmth
- Adjustable waist cinches snugly and securely with black toggle-lock drawstring
- Adjustable sleeve cuffs with hook-and-loop closures
- Heavy-duty YKK two-way zipper with weatherproof snap-closure storm flap
- Detachable hidden hood with toggle-lock drawstring and hook-and-loop closure
- Hidden back-mounted d-ring with storm flap
- Meets ANSI/ISEA 107-2015 Type R Class 3 standard

40507 Large  
Available in sizes M-5XL

### POCKETS 1 & 2

XL weatherproof chest pockets with storm laps and hook-and-loop closures.

### POCKETS 3 & 4

Oversized hidden interior chest pockets with hook-and-loop closure.

### POCKET 5

Weatherproof side-entry Napoleon pocket with water-resistant zippers.

### POCKET 6

Roomy and convenient left-side zippered chest pocket with storm lap.

### POCKET 7

Easy-access clear badge holder protected with a hook-and-loop closure with storm-lap overlay.

### POCKET 8

Convenient oversized pen holder pocket that holds up to three pens.

### POCKETS 9 & 10

Insulated and roomy fleece-lined hand pockets with water-resistant zippers.

### POCKET 11

XXL weatherproof tech pocket with storm-lap protected zipper closure designed for laptops and tablets.

**DIRECTSAFETY**

**Type R Class 3 Quilt-Lined Bomber Jacket**

A hard-working quilted bomber jacket that stands up to the toughest working conditions. Constructed of 300-denier nylon with a polyurethane coating and tape-sealed seams, this jacket is also waterproof. Smart pocket sizing and placement securely hold your belongings while two-inch reflective tape makes sure you're seen.

- Convenient pockets for work ID, mobile phone, storage and more
- Insulated with a quilted liner for added warmth
- Adjustable sleeve cuffs and waist
- Detachable hidden hood with toggle-lock drawstring
- Meets ANSI/ISEA 107-2015 Type R Class 3 standard

34827 Large  
Available in sizes M-4XL

**TINGLEY**

**Job Sight Zip-Up High-Visibility Hooded Sweatshirt: Fluorescent Yellow-Green**

How do you make the hoodie even better? Use high-density polyester sweatshirt fabric that's ultra-warm yet breathable. Then make it visible day or night with fluorescent fabric with two-inch reflective stripes. Two roomy pockets keep hands warm and small tools within reach.

- Ultra-warm, breathable sweatshirt construction
- Fluorescent fabric for daytime visibility
- Reflective stripes for nighttime visibility
- Meets ANSI/ISEA 107 Type R Class 3 standard

180140 Large  
Available in S-5XL

**M MAJESTIC**  
RELIABILITY IN SAFETY

**High-Visibility Hooded Sweatshirt with Teflon® Fabric Protector**

It's like a hoodie with safety super powers. Cold wind and rain are no match for the dependable warmth and water-repellent qualities of this heavyweight hoodie. Unlike the invisible force field of Teflon® fabric protector, you'll be seen day and night due to fluorescent fabric and reflective striping.

- High-vis fluorescent yellow with reflective stripes
- Teflon® fabric protector for water resistance
- Meets ANSI/ISEA 107 Type R Class 3 standard

38277 Hi-Vis Yellow, Large  
Available in S-6XL

Custom imprints available for most jackets, sweatshirts and vests. Contact our Customs Team - 877.843.3762 or email [customs@conney.com](mailto:customs@conney.com)

**TINGLEY**  
**Icon™ Breathable High-Visibility Jacket**

Bring on the rain and wind—this workhorse has your back. Polyurethane-coated polyester and stitched and taped seams give you 100 percent waterproof protection. The two-way zipper with storm fly front and throat guard seals out wind and rain. In back, a fully vented cape keeps you cool while the on-board D-ring provides quick fall harness connection.

- Convenient pockets for work ID, mobile phone, storage and more
- PU coating, sealed seams and storm fly front keep you dry
- Two-inch reflective tape and fluorescent fabric ensures around-the-clock visibility
- Black hem and sleeves hide dirt and grime
- Meets ANSI/ISEA 107 Type R Class 3 standard

16160 Large  
Available in M-5XL

**M MAJESTIC**  
RELIABILITY IN SAFETY

**High-Visibility Waterproof Jacket with DOT Striping and Quilted Liner**

Count on this easy-wearing bomber to shelter you from the storm. An integrated quilted liner chases chills while the polyurethane coating repels rain, slush, snow — even unexpected road splashes. Black fabric in all the right places hides dirt and grime.

- Reflective DOT striping keeps you safe and seen, night and day
- Integrated quilted liner, tuck-away hood and fleece-lined collar keep out the cold
- Meets ANSI/ISEA 107-2015 Class 3 Type R standard

38263 Large  
Available in S-6X, LT-4T

**MCR SAFETY**

**Luminator™ Two-Tone High-Visibility Quilted Bomber Jacket**

When being seen day and night is a top priority, this high-vis rainproof bomber is your go-to gear. The bright fluorescent lime fabric provides daytime visibility while two-inch silver reflective stripes keep you safe and seen in low light. Black fabric in all the right places hides dirt and grime.

- Quilted liner for added warmth
- Detachable drawstring hood with pull stops
- Plentiful pockets: two front zipper pockets, cell phone pocket, three inner pockets and two mic-tab holders
- Meets ANSI / ISEA 107-2015 Class 3 Type R standard

68328 Large  
Available in S-6X, LT-4T

**DIRECTSAFETY**

**Type R Class 2 Mesh Two-Tone Vest**

Keep everyone on your crew safe, seen and cool. Fluorescent yellow mesh and two-inch reflective stripes ensure high visibility, day or night. Made from durable 100 percent polyester mesh, this safety vest is machine washable.

- 24-hour visibility with fluorescent fabric and reflective stripes
- Easy-on, easy-off zipper
- Inside pocket and two mic tabs

11542 Large/X-Large  
Available in S-5XL and Orange

**DIRECTSAFETY**

**Type R Class 2 Mesh Traffic Vest**

Easy-on, easy-off convenience that boosts visibility (and compliance). Breathable fluorescent polyester mesh with two-inch reflective stripes keep you seen day or night. The quick hook-and-loop closure and machine-washable construction is ideal for road crews, utility workers, surveyors and more.

- 24-hour visibility with fluorescent fabric and reflective stripes
- Hook-and-loop front closure
- Inside pocket and two mic tabs

14455 Large/X-Large  
Available in S-5XL and Orange

# Which winter glove is right for you?

Whether your gloves are for work or driving, they must have two specific features to be considered winter gloves—an exterior layer and an interior lining. Some gloves have additional layers, but two is the threshold. Once you've determined the type of hand protection you need, consider the inside glove lining that will be most appropriate for your task and work environment. Gloves with a removable liner, like Thermastat® Insulating Liner Gloves, can be separated and used as a non-insulated protective glove, a non-protective thermal glove, or paired together for protection and warmth. These gloves are very good at wicking moisture and keeping hands dry and warm. When determining how much insulation you need, consider the temperature of the environment in which you will be working. Some glove manufacturers, like Superior Glove™, temperature-rate their gloves to help you decide which glove is right for your working conditions.

- 

**Cotton or foam insulation**  
This is a lightweight, economical and relatively dexterous option. It's the most basic type of lining for winter gloves and is not always desirable due to the high absorbency level, which can wick away heat at a rapid pace.
- 

**Thinsulate™ insulation**  
This innovative insulation option is a trademark of 3M™. It provides superior insulation and warmth, without adding bulk to the gloves. Typically, gloves with Thinsulate™ lining are much thinner than other winter work gloves. Thinsulate™ lining allows moisture to escape.
- 

**Pile insulation**  
This is a heavyweight synthetic option. It provides good insulation and comfort. Pile creates more loft to trap warmth.
- 

**Fleece insulation**  
This liner type is lightweight, but warmer than cotton/foam insulation options. It's also less bulky than other liners.
- 

**Acrylic insulation**  
This fast-drying lining option provides excellent warmth, but is a little more bulky than other liners. Terry loop acrylic creates loft to trap warmth.
- 

**Waterproof liners**  
There are many waterproof lining options available, which can be beneficial if you're working in cold, wet conditions. Waterproof liners provide excellent wind protection and maintain heat better than non-waterproof options.

## Essential Glove Features

-  Water Resistant
-  Hi-Vis
-  Leather
-  Kevlar
-  Oil/Solvent Resistant
-  Anti-Abrasion
-  Cut Resistant
-  Cold Applications
-  Reinforced Thumb
-  Impact Resistant
-  Puncture Resistant

### DIRECTSAFETY.

#### Dagger® X4 UC Cut-Resistant Gloves: Gray

The ideal blend of cut protection, comfort and control. 18-gauge high-performance polyethylene (HPPE), glass fibers and steel fibers provide ANSI A4 cut-resistance with unrivaled dexterity. Wear alone or as a liner under leather, mechanic-style, disposable or chemical gloves.

- ANSI Level 4 cut resistance
- Elongated cuffs for added wrist protection
- Constructed from polyurethane, HPPE, glass fiber, steel, spandex, nylon and polyester

53472 Large  
Available in S-2XL

### DIRECTSAFETY.

#### High-Visibility Insulated Cold Snap™ Gloves: Terry Cloth, Foam Latex Coated

Warmth, abrasion protection and grip, even in the bitter cold. The heavyweight terry shell provides extra warmth for outdoor and indoor work. The foam latex coating on the palm and fingers gives added abrasion resistance and grip.

- Foam latex on palm and fingers for grip and abrasion protection
- High-visibility design ensure you're seen in all light conditions

57018 Large  
Available in S-XL

### DIRECTSAFETY.

#### Armor Skin™ Heatlok™ Lined Waterproof Gloves

The wear resistance of leather, with added impact protection. Neoprene knuckles absorb shocks while the waterproof, yet breathable knit and curved design provide all-day comfort. Hook-and-loop wrist closures ensure easy-on, easy-off convenience.

- M-patch palm and fingertip grips for supreme dexterity
- Neoprene-reinforced knuckles for impact protection
- Heatlok™ lined for added warmth

44850 Large  
Available in S-2XL

### DIRECTSAFETY.

#### Armor Skin™ Hi-Vis Heatlok™ Lined Waterproof Gloves

Essential knuckle protection in a yellow reflective fabric. These gloves wear like leather, but feature added impact protection. Neoprene knuckles absorb shocks while the waterproof, yet breathable knit and curved design provide all-day comfort. Hook-and-loop wrist closures ensure easy-on, easy-off convenience.

- High-vis yellow on back of hand
- M-patch palm and fingertip grips for supreme dexterity
- Neoprene-reinforced knuckles for impact protection
- Heatlok™ lined for added warmth

44862 Large  
Available in S-2XL

**Dexterity® Winter-Lined Nylon Gloves with PVC Palm**

Your go-to glove for dexterity and grip, even in cold, wet conditions. Water-repellant and quick-drying, this lightweight glove delivers all-day comfort even in sub-zero working conditions.

- Micropore PVC coating for flexibility in sub-zero temperatures
- Palm coated for excellent wet and dry grip
- Warm, insulating fleece lining

75662 Large  
Available in S-2XL

**SnowForce™ Extreme Cold Winter Gloves**

Get your grip with a tough glove that's waterproof, windproof and chillproof. Porelle Ski-Dri2™ waterproof, breathable inserts lock out water and wind while wicking sweat. A Kevlar®/stainless steel layer and padded knuckle strap protects against hard knocks, scrapes and abrasions.

- Three layers of bulk-free insulation
- Protective Kevlar®/stainless steel layer and padded knuckle strap
- Flexible, anti-slip palm and fingertips
- ASTM ANSI level 3 puncture resistance

29607 Large  
Available in M-XL

**Emperor Penguin Winter Lined Sandy Latex Glove: 13-Gauge, Orange**

Cold-weather, waterproof hand protection that delivers a sure grip. Equipped with a waterproof latex coating and insulated liner, this glove protects you from the elements. The pre-curved design minimizes fatigue and enhances grip performance.

- Waterproof closed-cell latex dip
- Sandy latex palm for dependable grip
- 13-gauge nylon shell in hi-vis orange
- Soft-brushed 10-gauge insulated acrylic liner

81349 Large  
Available in S-2XL

**Memphis® Ninja® Ice Gloves: Nylon, Fully PVC Coated**

Extreme cold and wetness are no match for the Ninja. A dual shell of a seven-gauge acrylic terry and 15-gauge nylon, along with a flexible thermal liner, keeps hands warm and dry. Proprietary Hydropellent Technology™ repels liquids and delivers grip in both wet and dry conditions. This same layer also cushions the hand and minimizes impacts. The combined result is a thermal lining that stays soft and flexible in temperatures as low as -58°F.

- 7-gauge acrylic terry liner
- 15-gauge nylon exterior liner
- Hydropellent Technology™ repels liquids

16238 Large  
Available in M-2XL

**Endura® Goat-Grain Driver Gloves with Kevlar® Liner**

Keep hands warm and responsive for cold-weather driving. Strong, abrasion-resistant goatskin provides cold-weather comfort for working hands.

- High tensile-strength goatskin protects against abrasions
- Keystone thumbs enhance durability and comfort
- Brushed jersey fleece interior with 100 g Thinsulate™ lining delivers long-lasting warmth in temperatures as low as 5°F

75668 Large  
Available in S-2XL

**Emerald CX® Cut-Resistant Kevlar®/Steel Winter Glove with PVC Palm**

Protect hands from cuts and lacerations in cold-weather conditions. A high-performance Kevlar®/steel knit paired with a high-grip palm keep you safe and in control.

- Blended Kevlar®/steel knit for cut protection
- PVC palm coat provides a wet and dry grip
- Insulating acrylic fleece lining
- Touchscreen compatible

75673 Large  
Available in S-2XL

**Social Distancing Floor Tape: Polyester Overlamine, Yellow/Black**

Mark a safe six-foot distance with this self-adhesive floor tape. Just cut to desired length and place on floor.

- Highly visible and effective social distancing reminder
- Provides guidance for lines and high-traffic areas
- "Please Keep About 6 Feet (2 m) Distance" repeats every 18 inches

99256 4"x100"

**3M™ Ultra Durable Floor Marking Tape 971, 33 mil, Yellow**

For heavy-duty tasks, choose a heavy-duty tape. This durable floor marking tape withstands heavy traffic with vivid colors that endure heavy industrial abrasion from forklifts, pallets and more.

- Polylactic acid (PLA) backing and rubber adhesive withstand heavy industrial traffic
- Non-curling backing resists edge lift
- Bonds strongly to floors with clean, one-piece removal

51806 2" X 36 yds.  
Available in sizes: 3" X 36 yds, 4" X 36 yds.

### 3M™ Versaflo™ Healthcare PAPR Kit TR-300N+

High-efficiency, ready-to-use particulate protection system with patient-friendly features. Enhanced visor design and wider field of vision allows patients to see caregiver's entire face. The uniquely shaped headcover enables easy, hassle-free access to ears and stethoscope. Select from two flow rate options (6.5 CFM and 7.2 CFM) for greater user versatility and comfort.

- Patient-friendly design with whole-face visibility
- Caregiver-friendly quick-release connection and kink-resistant breathing tube
- Convenient, maintenance-free disposable hood
- Includes headcover, length-adjustable breathing tube with cover, carrying bag, easy-clean belt, high-capacity battery, battery charger and HE filter/pre-filter

76486 Small/Medium  
76487 Medium/Large

### 3M™ Versaflo™ Easy Clean PAPR Kit TR-300N+ ECK

A versatile, maintenance-free, ready-to-use particulate protection system ideal for pharmaceutical, healthcare and food safety use. Disposable hood allows caregivers to spend less time cleaning and more time on task. Sleek, contoured design with smooth outer surfaces enables work in tight spaces. Select from two flow rate options (6.5 CFM and 7.2 CFM) for greater user versatility and comfort.

- Wide field of vision compatible with safety eyewear
- User-friendly quick-release connection and kink-resistant breathing tube
- Convenient, maintenance-free disposable hood
- Dual audible and visual alarm indicates low battery and low flow
- Includes hood with integrated head suspension, length-adjustable breathing tube, easy-clean belt, high-capacity battery, battery charger, HE filter/pre-filter and airflow indicator
- NIOSH-approved

76484 TR-300N+ ECK Kit

### 3M | PELTOR™ 3M™ PELTOR™ WS™ LiteCom Plus Headset with Headband

Get clear, hands-free radio communication, even in loud environments. This next-generation headset uses analog UHF two-way radio technology with 22 pre-programmed FRS channels, giving you dependable communication. Bluetooth® multi-point technology connects to another Bluetooth® device. The waterproof, dustproof IP68 noise-canceling boom microphone withstands the rigors of demanding work environments.

- Two-way UHF radio with 22 FRS channels
- Simple, intuitive controls
- Environmental listening sensors protect hearing in noisy conditions
- Meets IP54 standard for water and dust resistance

73766 WS™ LiteCom Plus

### BRADY® Hand Sanitizer Lock Box

Keep hand sanitizer readily available and protected from theft with this lockable box.

- Steel construction provides strong, dependable protection
- Lockable design deters theft
- Includes mounting hardware

99248 Steel, Blue/White

## Direct Safety® Matting

Workplace matting is a must-have for winter. And Direct Safety® matting is affordable, customizable and durable. Choose from anti-fatigue matting, outdoor matting, entrance matting and more. To keep dirt, mud, snow and slush from creating a mess and dangerous fall hazards, pair outdoor matting (like the Direct Safety® Outdoor Defend or Outdoor Refuge mats) with indoor wiper entrance mats (like the Direct Safety® Expedition Saxony or Ridge mats).

Using scraper and wiper mats eliminate as much as **75% of dirt** being tracked into a building.

To customize your matting, contact our Customs & Sourcing Team at 877-843-3766

### Expedition Saxony Entrance Mat

For outstanding absorption and durability, choose the classic Direct Safety® Expedition Saxony Entrance Mat.

Recommended for use in medium- to high-traffic entrances.

Available in these sizes:  
2' x 3', 3' x 5', 3' x 10',  
4' x 6', & 4' x 8'

Custom sizes available!

### Expedition Ridge Entrance Mat

The top-selling Expedition Ridge provides good performance at a value price.

Recommended for use in medium-traffic indoor entrances.

Available in these sizes:  
2'x3', 3'x5', 3'x10',  
4'x6', & 4'x8'

Custom sizes available!

### Outdoor Defend Mat

The Direct Safety® Outdoor Defend Mat provides classic fingertip construction with outstanding cleaning action and anti-slip performance.

Recommended for medium to high-traffic outdoor entrances and snowy or muddy conditions.

Available in these sizes:  
24" x 32", 32" x 39", 36" x 60"  
& 36" x 72"

Custom sizes available!

### Outdoor Refuge Mat

The popular Outdoor Refuge Mat provides great shoe-scraping performance, durability and weather resistance. Thickness: 1/4-in.

Recommended for high-traffic outdoor entrances.

Available in these sizes:  
3' x 5' & 4' x 6'

Custom sizes available!

### Ovation Holes Anti-Fatigue Mat

The Direct Safety® Ovation Anti-Fatigue Mat is manufactured from a hard-wearing rubber compound, and features holes that drain away liquids from the work area. Recommended for use in wet areas and food processing areas, as well as oily and greasy industrial workstations. Thickness: 5/8-in.

- Modular size-to-fit matting with built-in connectors
- Nib backing elevates mat for improved drainage
- Available with black or yellow edging

Available in these sizes:  
3' x 3' & 3' x 39'

## DIRECT SAFETY

### Dakota Foam Safety Glasses: Anti-Fog Lens

Boost safety compliance with the safety glasses that comfortably fit almost everyone. The one-piece wraparound polycarbonate lens offers full-brow protection and a wide, unobstructed field of vision. The foam seal protect eyes from dirt and debris.

- Wide, unobstructed field of vision
- Frameless, sleek spatula temple styling
- Meets ANSI Z87.1-2015 standard for impact resistance

59829 Clear  
59830 Gray

## DIRECT SAFETY

### OTG Safety Glasses: Anti-Fog Lens

Keep a low profile with these sleek over-the-glass polycarbonate wraparound safety glasses. The clear wraparound design protects you from all sides. The anti-fog coating gives you clear sightlines while blocking 99.9 percent of UV rays.

- Anti-fog polycarbonate lens
- Clear polycarbonate frame for unobstructed views
- Integrated stay-in-place nose piece
- 99.9% UV protection
- Meets ANSI Z87.1-2015 standard for impact resistance

59779 Clear

## Honeywell UVEX

### Genesis® Safety Glasses: HydroShield™ Anti-Fog Lens

Boost the performance of your impact-absorbing Uvex® Genesis® safety glasses with the dual-action HydroShield™ anti-fog and anti-scratch coating. It prevents fogging for up to 60 times longer while doubling your lens scratch protection. Uvextreme coating blocks 99.9 percent of UV rays.

- Clear lenses for accurate vision indoors
- Tough polycarbonate lenses diffuse and deflect impacts
- Adjustable temple length and three-position ratchet inclination for comfortable fit
- Meets standards for ANSI Z87.1-2015 and CSA Z94.3

Frame Colors: [Black] [Brown] [White]  
Lens Colors: [White] [Brown]  
Coatings: HydroShield Anti-Fog

## Honeywell UVEX

### Genesis® Safety Glasses: Uvextreme Anti-Fog and Hardcoat

These anti-fog wraparounds are like a UV shock absorber for your eyes. The unique ventilation channel reduces moisture buildup and fogging. Lenses are easy and economical to replace. Prescription and reader inserts are also available.

- Tough polycarbonate lenses diffuse and deflect impacts
- Lens tints for most tasks and conditions
- Adjustable temple length and three-position ratchet inclination for comfortable fit
- Uvextreme coating blocks 99.9% of UV rays
- Meets standards for ANSI Z87.1-2015 and CSA Z94.3

Frame Colors: [Black] [Blue] [White]  
Lens Colors: [White] [Brown] [Yellow] [Gray] [Green] [Black] [Blue] [Red]  
Coatings: Uvextreme Anti-Fog, Ultradura Hardcoat

## 3M

### 3M™ Solus™ 2000 Series, Scotchgard™ Anti-Fog Coating, Clear AF-AS Lens

The innovative 3M™ Solus™ 2000 Series safety glasses are designed with adjustable ratchet temples and Scotchgard™ anti-fog coating, which resists fogging longer than traditional anti-fog coatings, even after up to 25 washings with water. Polycarbonate lenses absorb 99.9 percent of UVA and UVB rays. Glasses meet the requirements of the ANSI Z87.1-2015 Standard as an Impact Rated Spectacle.

Frame Color: [Black] [Green] [Blue]  
Lens Color: [White] [Gray] [Red] [White] [Gray] [Black] [Brown] [Yellow]  
Lens Coating: Anti-Fog, Anti-Scratch  
Anti-Fog, Anti-Scratch

## DIRECT SAFETY

### Dakota Safety Glasses

This versatile safety eyewear offers the flexibility to fit any face shape. One-piece wraparound polycarbonate lens produces full brow protection and a wide, unobstructed field of vision.

- Meets ANSI Z87.1-2015 standard for impact resistance
- Small frame and readers available

Frame Colors: [Orange] [Blue] [White] [Gray]  
Lens Colors: [Orange] [Blue] [White] [Gray] [Black]  
Coatings: Anti-Fog, Hardcoat

## DIRECT SAFETY

### Kohesion Safety Glasses

Kohesion safety glasses feature a wraparound lens that brings together an unobstructed field of vision and superior side protection. Non-slip rubber temple tips and an integrated nose piece produce a custom fit.

- Meets ANSI Z87.1-2015 standard for impact resistance

Frame Colors: [Orange] [Blue] [White] [Gray]  
Lens Colors: [Orange] [Blue] [White] [Gray] [Black]  
Coatings: Anti-Fog, Hardcoat

## Safety Lens Color Guide

Which lens tint color is best for your task? Different colors filter light in different ways, which makes some tints better suited for certain tasks. For blocking UV light, lens color does not matter. In fact, clear lenses can block UV light as well as dark-colored lenses.

You can enhance tint performance even further with mirrored and polarized coatings. Mirrored lenses provide additional light and glare deflection. Polarization boosts visual acuity and glare reduction in highly reflective areas (near water, metal surfaces, etc.).

<b>Blue</b>	Enhances contours and color perception. Reduces glare in bright conditions (like snowy worksites) and near highly reflective surfaces (like water, glass or metal structures). Also ideal when working with sodium vapor lighting.
<b>Brown, Espresso and Copper</b>	For bright sunlight and high-glare conditions that can increase eye strain and fatigue.
<b>Clear</b>	Ideal for most indoor work.
<b>Gray</b>	Minimizes outdoor sunlight and glare. Enables accurate color perception.
<b>Dark Gray</b>	Minimizes eye fatigue due to sunlight and outdoor glare.
<b>Green</b>	Reduces glare while boosting contrast and sharpness. Preserves color balance. Certain green shades reduce eyestrain. Ideal for precise tasks.
<b>Red and Vermillion</b>	For indoor tasks where high contrast and enhanced detail perception is needed (like during inspections). Also soothes eyes for extended wear.
<b>Yellow, Orange and Amber</b>	Increases contrast in hazy, foggy or low-light conditions.

## Fogging Up?

Safety glass fogging up can be a serious hazard year round — especially when wearing face masks. Besides blocking vision, workers' eyes are exposed to safety hazards when glasses are removed for de-fogging.

The solution is anti-fog lenses. The coating resists fogging even in extremely hot, cold or humid conditions. Check out the anti-fog lens options featured on these pages and at [conney.com](http://conney.com).

## Honeywell MILLER

### H100 Series Safety Harnesses

Essential, lightweight harnesses designed to meet the most common fall protection needs — and at an exceptional value. Five-point adjustment and sub-pelvic straps provide a snug, yet comfortable fit. A durable label pouch and lanyard keeper make harness identification easy, shift after shift.

- High-visibility straps
- Snug, comfortable five-point adjustment
- Steel D-ring
- Fall indicator
- Meets ANSI Z359.11-2014, OSHA 1910.140 and OSHA 1926.502 standards

- 48204 H100 Harness Tongue Buckle Leg
- 48205 H100 Harness Mating Leg

## PELICAN™

### 2765 LED Headlamp

Ultra-compact and lightweight hands-free headlamp ideal for hazardous environments. Equipped with three uniquely positioned LEDs, this small but mighty light produces up to 155 lumens for more than nine hours. Choose from four lighting modes (high, low, downcast, flashing) to illuminate pathways, reading spaces and face-to-face interactions without blinding others. The full-time battery level indicator monitors remaining battery life so you're never left in the dark.

- Four lighting modes: high, low, downcast and flashing
- Downcast LEDs for non-blinding illumination
- Full-time battery level indicator
- Stretchy, secure cloth head strap
- Class I Division I certified

18395 2765 LED Headlamp

## PELICAN

### 3415M Right Angle Light

Get the job done under any circumstance with this multi-task compact work light. It features three lighting modes: flood (177 lumens), spot (186 lumens) and spot/flood (336 lumens). This one versatile light illuminates close-up tasks, wider work areas and dark spots hundreds of yards away. The articulating head and built-in clip directs light wherever needed, while a heavy-duty magnet securely attaches to steel surfaces for hands-free lighting.

- Two LED lights with three brightness levels
- Three lighting modes: flood, spot and spot/flood
- Articulating head directs light wherever needed
- Functions as a handheld light and right-angle light
- Class I, Class II and Class III Division I certified

18396 3415M Right Angle Light

# DIRECTSAFETY® First Aid Kits

## DIRECTSAFETY® Crusader™ First Aid Kit

# Safety Consulting, Training and Services

Conney Safety offers a complete range of turnkey and customized safety services. All are designed to lower your safety risk while boosting compliance and productivity. Our holistic approach to safety and real-world solutions are why Conney Safety is the partner of choice for companies worldwide.

## Consulting and Planning

Whether your safety plan needs updating or is still in development, Conney Safety can help take your plan from ideation to completion. From getting management on board to keeping employees trained, our Certified Safety Planners can walk you through each step of creating, executing and maintaining a rock-solid safety program. Our consulting expertise includes:

- Identifying workplace hazards
- Emergency preparation and response
- Compliance: requirements and recommendations
- And more

## Inspection and Facility Services

Without preventive check-ins and fine-tuning, even the strongest safety program can develop weak spots. Make sure employees are safe, avoid OSHA fines and keep operations running at peak performance with Conney Safety's inspection and facility services.

### Assessments

- Emergency notification system
- Spill and leak remediation
- Arc flash risk
- And more

### Site Safety Audits

- PPE
- Chemical management
- Compliance
- And more

### Inspections

- Confined spaces
- Yearly competent person
- Fall protection
- And more

### Testing and Evaluations

- Powered industrial truck
- Respiratory fit testing
- Electrical glove testing
- And more
