## Potential Application/Industries

- Sweeping
- Sanding
- Grinding
- Sawing
- Bagging
- Dry chemical handling
- Emergency preparedness
- Laboratories
- Food preparation
- Mineral processing
- Agriculture
- General maintenance

Fit is an important aspect of respirator performance. In the United States and Canada, mandatory respirator wearers must undergo fit testing, per OSHA and other applicable requirements. This respirator was originally designed to fit facial features common in China and may not have as high a fit test pass rate as respirators that were originally designed to fit facial features common in North America.

## Ordering Information:

Description	UPC	ID#	Respirators/Box	Boxes/Case	Each/Case
Particulate Respirator, 9502+N95	56912504293538	7100240920	50	10	500

### WARNING

These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the User Instructions provided as a part of the product packaging. Follow all local regulations. In the U.S., a written respiratory protection program must be implemented meeting all the requirements of OSHA 29 CFR 1910.134, including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in sickness or death. For correct use, consult supervisor and User Instructions, or call 3M PSD Technical Service in U.S. at 1-800-243-4630 and in Canada at 1-800-267-4414.
