

Update: ShockWave Concentrate Availability

Revised: 4/01/2020

ICP has a current shortage in a key raw material that is significantly impacting our Shockwave Concentrate disinfectant supply, as a result of industry wide raw material allocations. We are shifting our manufacturing production to build more inventory of Shockwave RTU to satisfy backlog or future customer orders of Shockwave Concentrate. We will review our situation on a daily basis to ensure that all measures we are taking will have the greatest impact for product supply to our customers. We stay committed to supplying you with a variety of disinfectant products included on the EPA N-List to continue the fight against COVID-19.

EPA COVID-19 Disinfectant List N

The EPA has established a list of disinfectants (List N) that meet their criteria for use against SARS-CoV-2, the cause of COVID-19. The following ICP products are included on List N and meet EPA's criteria for use against SARS-CoV-2, the novel coronavirus that causes the disease COVID-19.

- ShockWave Concentrate (61178-1-73884)
- Fiberlock ShockWave RTU (61178-2-73884)
- Benefect Botanical Decon 30 (84683-3-74771)
- Benefect Botanical Disinfectant Wipes (84683-4-74771)
- IAQ 2000 (1839-95-73884)
- IAQ 2500 (1839-83-73884)
