

minion

Powerful
New Generation
Electrostatic
handheld sprayer
dual function

High Intensity Negative Ion generator

Minion blows out 8800 cubic foot per minute of negatively charged air while spraying the disinfectant at an adjustable rate of 1.7 – 2.4 oz/min. The flow of 8200W/in³ of negative-ion attracts positively charged airborne particles such as dust, pollen, and pathogens of viral, bacterial, or fungal origin, and particle matters less than 2.5 microns (PM2.5) in the surrounding air and neutralize them, making them heavier to descend down on the floor. Then the sprayed disinfectant over the surface can kill those pathogens effectively.

As a result, this technology aims to
not only disinfect the surfaces
but also purify the surrounding air.

- ✓ New Technology Electrostatic Mist Sprayer
- ✓ Disinfect Surfaces and Purify the Air
- ✓ Rechargeable Lithium-ion Battery
- ✓ Long Spray Distance
- ✓ Adjustable nozzle
- ✓ Light Weight and Portable

Specification

- Container volume: 61oz (1.8L)
- Spray flowrate: 2.4oz/min (70mL/min)
- Effective spray distance: 10ft
- Air flowrate: 8800cft (250cbm)
- Static ion coverage distance: 16ft
- Negative ion intensity: 8200W/in³ (500W/cm³)
- Battery: Li-ion 20V- 2500mA (2 batteries included)
- Power: 129W
- Current: 6 amps
- Operating time: 25~30 minutes
- Charging time: 3 hours
- Charger input power: AC 100-240V 50hz/60hz
- Noise level: 75dB
- Net weight: 2.1lbs
