- Eye and full-face protection from sprays, sneezes, splashes, and splatters.
- Comfortable design for extended wear.
- Convenient adjustable band for secure fit.

---

### FAQs:

- **Is this a substitute for n95 masks in a medical setting?**

No. These devices are often used simultaneously *with* n95 masks, to protect the full face and eyes from sprays, splashes, sneezes, and splatters.

- **Is this designed for multiple uses?**

This PPE Face Shield can be used multiple times, depending upon your application. It can be wiped off but may degrade over time. In exposed healthcare settings, depending upon your protocol, it may be for one-time disposable use.

- **What are the materials?**

Shield is 16-ml clear PET.

Band is 18-ml vinyl.

- **Do these contain latex?**

These are latex-free.

- **Are these sterile?**

These devices are manufactured in a clean, but non-sterile environment. They can be wiped down with disinfectant wipes or spray and soft cloth or tissue before wearing.

## print and marketing... made better

- **Are these from overseas?**

All materials are domestic. These are manufactured, assembled, and shipped from Wisconsin.

- **Can we make a donation of shields?**

We cannot. We understand the extreme need and want to be the best possible partner. Rather than making decisions regarding who is more worthy of donations, we are instead focusing on doing everything possible to keep our pricing low, and production high.

- **What is the typical shipping time?**

This varies depending upon supply and production, but *generally* ships within 1-5 working days.  
***(Check based on quantity and current production.)***

- **Are these guaranteed?**

Like all similar products, except where expressly prohibited by law, no warranties of any kind are offered, including warranties of non-infringement and fitness for a particular purpose.
