Creating Safer Work Environments™

CONN+NEY® SAFETY

A DIVISION OF WESCO DISTRIBUTION, INC.

Workplace exposure can lead to Illness and OSHA citations!

Exposure to chemical vapors, gases, dusts, noise, and fumes are a significant threat to worker health and safety. Regular testing and measurement to assess the hazards is essential to ensuring workers are protected and safe.

If you're seeking comprehensive air monitoring services at your facility, look no further than Conney Safety. We'll be able to provide reliable measurements that you can use as a guide to:

- Selecting personal protective equipment such as respirators and ear plugs.
- Identifying and marking areas where protection is needed.
- Assessing the potential health effects of worker exposure.
- Determining the need for additional medical monitoring or control measures.

Did You Know:

In 2016, there were 518 workers who died from exposure to harmful substances or environments.

As of 2015, 4.7 per 100 workers suffer illness or injury from exposure to harmful substances or environments.
