

Personal Protective Equipment Training

Creating Safer Work Environments™

CONNNEY
SAFETY

A DIVISION OF WESCO DISTRIBUTION, INC.

Since the topic of personal protective equipment (PPE) is very broad, it is a vital aspect of the employee safety education process. Conney Safety offers Personal Protective Equipment (PPE) Training for all the categories of PPE—plus, we can **customize** the training to your specific needs!

This hands-on training helps to identify:

- Selection – finding the best match to the work application
- Sizing – employees are more productive and comfortable when PPE is sized correctly
- Limitations – this can keep employees from getting hurt
- Life expectancy – identifying when a product should be discarded

PPE Training can cover and be customized to any of the following types of products:

- **Respirators** (all categories, including fit testing)
- **Hand Protection** (cut, chemical, heat, general purpose)
- **Clothing** (chemical suits, FR, rainwear, aprons, sleeves)
- **Hearing Protection** (earplugs, earmuffs)
- **Head Protection** (hard hats, bump caps)
- **Footwear** (safety toe shoes, chemical protection, accessories)
- **Heat/Cold Stress** (hydration products and clothing)
- **Welding** (helmets, eye protection, clothing)
- **Eye Protection** (glasses, goggles, face shields)
- Other topics can be addressed as needed

Conney Safety Services will tailor the training to meet your facility's needs, providing hands-on demonstrations and documenting PPE fitting to employees.

For more information on these services, contact our Certified Safety Professionals toll-free at **800-462-1947** or safetysupport@conney.com.
