

Gas Detection Equipment Repairs & Calibration

Creating Safer Work Environments™

CONNENEY
SAFETY
A DIVISION OF WESCO DISTRIBUTION, INC.

Keep Your Gas Detection Equipment in Optimal Working Condition

It is critical to the safety and well-being of your workforce that all gas detection, air monitoring, and environmental instruments receive consistent maintenance and service, along with regular calibration. Conney Safety provides services that help ensure that these devices are operating correctly and providing accurate readings.

If you're currently sending your instruments directly to the manufacturer, you've probably experienced lengthy turnaround times and endless back-and-forth. We've streamlined our Repair Center to **provide all the same services as the manufacturers, in about half the time.**

Factory-certified technicians at Conney Safety can service all your gas detection, air monitoring, and environmental instruments to manufacturers' specifications. We can also provide warranty work and preventative maintenance programs.

Our Repair Center is your total solution for gas detection equipment maintenance and service.

Brands we service include:

We are Proud to Offer:

- Repair and Calibration of Portable Gas Detection Equipment
- Fleet Program Management
- A Complete Selection of In-Stock Replacement Parts, Accessories, and Calibration Gases
- Rental Instruments
- Ecosmart Gas Cylinder Recycling Program
- Expedited Repair Services

Benefits:

- Decreased equipment down time
- Decreased repair costs
- Increased performance and reliability
- Increased return on investment

Minimum labor/calibration charge:
\$95.00 plus any parts, shipping, and tax.
