

HM IMPACT[®]

MINER SERIES

MODEL NO. 8015

FEATURES KEYS & BENEFITS

One-Piece DNX Grip[™] Palm: Adds grip control and cut level-two protection.

Double-Stitched Palm: Adds durability and longevity in high-wear areas of the glove.

Segmented Three-Layer Foam: Adds back of hand impact protection against impacts, lacerations and abrasion.

Segmented TPR: Adds impact protection for full back of finger to fingertips and thumb.

Reflective Fingertips and Hi-Vis Color: Allows user to see hands in low-light situations.

Adjustable Wrist Strap: Ensures a snug fit while gloves are in use.

Handling tools and equipment in the mining industry can result in debris impacting the back of the hand.

HM Impact gloves come with segmented three-layer foam and flexible Thermoplastic Rubber (TPR) that protects the back of hand, fingers and thumb from impacts, lacerations and abrasion, without restricting hand movement. The one-piece, DNX Grip[™] provides grip control and cut resistance and is double-stitched onto synthetic leather to add durability. The adjustable wrist strap ensures a snug fit while the gloves are in use.

• HEAVY CONSTRUCTION • DEMOLITION • JACKHAMMER PILOTS
• RIVETING • IMPACT & POWER TOOL USERS • PIT CREW
• CHAINSAW OPERATORS • MINING • CYCLING • MOTORIST
