KEEP YOUR GAS DETECTION EQUIPMENT WORKING LIKE NEW!

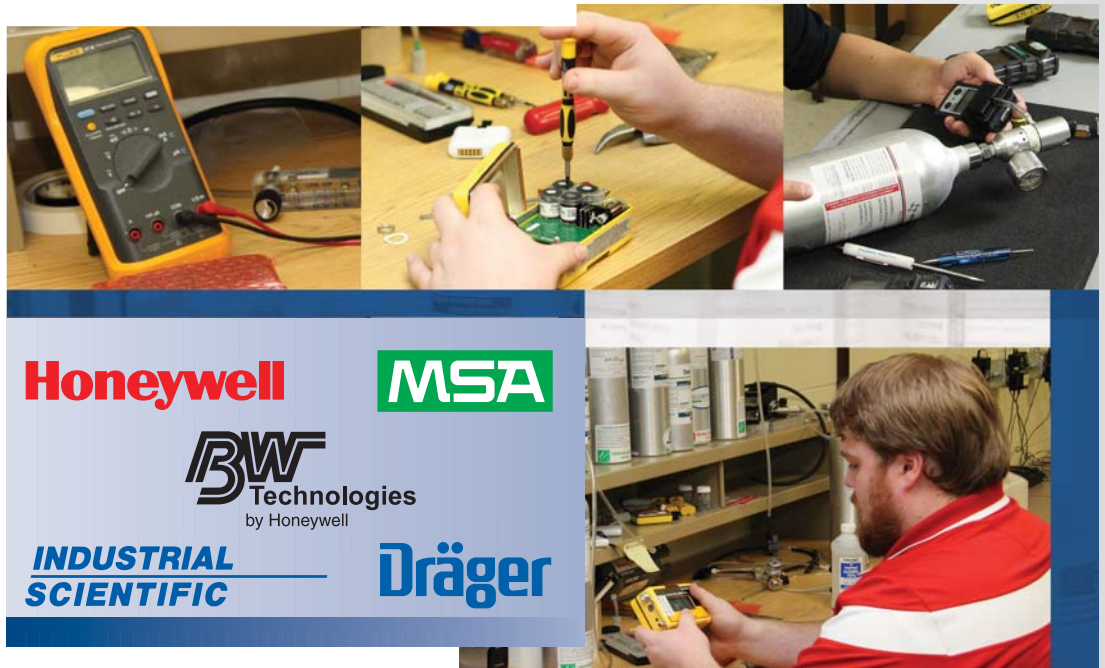

Our Repair Center is certified, dependable and fast.

It is critical to the safety and well-being of your workforce that all gas detection, air monitoring and environmental instruments receive consistent maintenance and service, along with regular calibration, to ensure that these devices are operating correctly and providing accurate readings.

The factory-certified technicians at Conney Safety can service all your gas detection, air monitoring and environmental instruments to manufacturers' specifications. We can also provide warranty work and preventative maintenance programs.

If you're currently sending your instruments directly to the manufacturer, you've probably experienced lengthy turnaround times and endless back-and-forth. **We've streamlined our Repair Center to provide all the same services as the manufacturers, in about 1/2 the time.**

With factory-certified technicians, quick turnaround times and competitive rates; Conney Safety's Repair Center is your total solution for instrument maintenance and service.
