

Signage

Did you know that studies have shown that signs that warn of dangers and hazards in the workplace can reduce accident rates as much as 80%? Encourage your customers to review their workplace for dangers and hazards that can be better identified through proper signage. For larger companies, consider an on-site walk through in conjunction with a sign survey. Accuform® offers a wide variety of stock signs and labels and can virtually make any custom sign or label as requested. They can even make signs in any shape that the customer requests. Custom items are normally priced based on three factors: size, material, and quantity.

Depending on the environment in which the sign or label will be placed, Accuform® offers over 30 different materials that will help increase the longevity of the product and most come with a guarantee of at least five years.

Here are three of the more common materials and environments in which they should be utilized:

Adhesive Dura-Vinyl

Outdoor Durability of 5-7 years

Service temperature of -20 to 176 degrees Fahrenheit

Resistant to abrasions, humidity, chemicals/solvents, and fading from sunlight

5-year guarantee

Plastic

Light duty indoor/outdoor use

Impact resistant

Non-glare finish

Service temperature of -90 to 168 degrees Fahrenheit

Aluminum

Endures outdoor environmental conditions

Withstands splashes and wash-downs

Service temperature of -40 to 250 degrees Fahrenheit

5-year guarantee

All of the materials and their basic features can be found on this chart:
